

DISCOVERIES

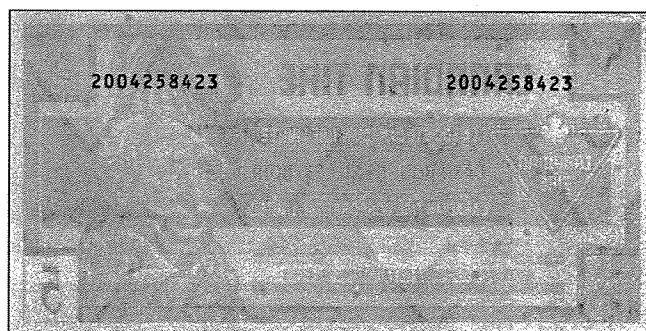

by Jerome Fourre #120

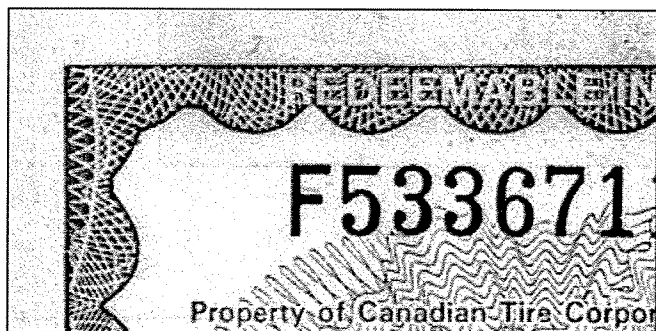

Notice the serial number in the top left corner.
This coupon was sent in by Richard Zaremba #398

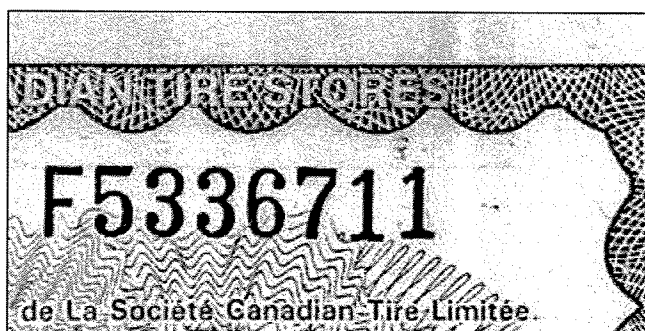

Notice the prefix, the top of the U seems to be closed.
This coupon was sent in by Doug Dunster #625. Doug also reports finding CTC 8 50¢ coupons with orange serial numbers. These coupons are known to have serial numbers ranging from brown through red to orange.

This coupon was sent in by Ron Rozeboom #191. Ron found this S26-B coupon in a new bundle of 100 coupons. The front of the coupon is normal but the back has, as you can see, only the serial number. Several other members have reported finding the exact same print error. Maybe someone would be interested in doing a study on these. Everyone that has found one could send in their serial numbers and they could see if any kind of pattern emerges.

This coupon was sent in by Jacques Ouellette #401. Jacques found this S11-C-F coupon and noticed the F prefix on the left side has the bottom horizontal line longer than the prefix on the right side. He shared his discovery with Thayer Bouck, but Thayer replied that he had not seen it before and did not have any in his stash.

The coupons that Jacques found were F5336711; F5370557; F5371894; F5373717; F5373960 & F5590851. The last one also has the toothpick variety on the front. Jacques would like you to verify your stash and report your finds to him at 51-35th Ave., Edmunston NB, E3V 2V1
