

JAKE'S LAST LUCKY NUMBERS - CONTEST

by Jacob Q. Hawkeye Hamilton #600

Unfortunately this is the last time for me to do a little rolling of the dice and reveal the membership number of a very nice person in our club. This contest was designed to get the membership to read the newsletter from cover to cover and find the lucky membership number hiding somewhere in each issue. It is not working, so the executive (they are some people that are supposed to be smarter than me) decided that this would be my last roll of the dice. They said that they did not want me to get into the habit of rolling dice and take up "gambling" (that's a new word for me), but no one will explain what "gambling" means to me.

est and let them read the "Collector" to find their membership number.

The three dice are each numbered from 0 to 9. The dice are in three pretty colors, a red, yellow and purple dice. This is how I read them, the red dice is the first number, the yellow is the second and the purple is the last number. So when I roll the dice with a little bit of drool for luck and the red dice says 4, yellow dice says 5 and the pretty purple dice says 4. Then my daddy wins! But I won't let that happen. But if I roll 567 then my Mommy wins, but to be fair my family will never win because some people may say I fixed it. Now I have to do this several times, because sometimes I might roll a membership number that might be too high and has not been issued so far, or that member is no longer a member of our club. Too bad for them! Happy hunting and I'll give you a clue, its not on this page. That would be too easy.

We still do not have a winner... that's three issues in a row that no one has claimed their prize. It makes me wonder whether they even read the Collector or just didn't find it. Member #307, Mr. Johann Walkowiak you missed your number on page 51 for the first prize and member #415, Mr. Carl Herteis missed his name on page 52 for the free membership. So the first prize a CTC Truck Series 1 Number 2 is once again carried over to this issue.

A quick recap on the rules. There is only one and its simple. No one is to help someone else out. Please be hon-

Once you find your number, write my Dad or even me, tell us where you found it and the prize is yours. Snail mail me or email me. Best of Luck!!!

ANOTHER MINOR VARIETY!

by Sandy lipin #333

I don't know if this minor variety has been reported yet but here it is anyway. On the S24-B and the S26-B 5¢ coupons there are two small white dots above the letter U in the word "UNIQUEMENT" on the reverse bottom of these two coupons. The fact that they are from different series is interesting. The same 1996 plate must have been used in order for this mark to appear as it did. I have found this minor variation in the 2000323640 to 2000324752 range on

the S24-B coupons and in the following serial number ranges 2004604037 to 2004611682 on the S26-B coupons 2007122957 to 2007134552 2012106257 2012109265/6

Below is a photocopy of the variety which appears on the S24-B and the S26-B notes.
