Broken B Variety
by Doug Adams #639

Didn't think too much about a CTC-7-B-B coupon with a broken B in the prefix. Until, that is, I found another identical one. Now I wonder just how many more there are out there. Just for the hell of it I'll call this one a Broken B, CTC7-B-pbb-B. (Hey, that's a heck of a lot of B's) Does anyone else have this variety? See scan.

#1 CTC S27- C2 "2004" 10¢ with a printing imperfection. This note has a portion of the "0" on the left 10¢ on the back which resembles a missing planchet, only it is larger than a planchet. This defect was found to come and go on several coupons in small runs of between 5 and 30 coupons. Found by Jerome Fourre #120

#2 CTC S27- C2 "2004" 10¢ with a printing imperfection. This note has a portion of the top border on the back which resembles a missing planchet. This defect was found on several coupons in one run of about 150 coupons. Found by Jerome Fourre #120
