

Lint variety (bl1, bl2 & bl3)

by Jerome Fourre #120

I have been researching this variety since I discovered it several years ago. So far I have found 3 different stages of this variety. Type 1 (bl2) which is the largest of the three, Type 2 (bl3) which seems to be just the right side of type 1 and Type 3 (bl1) which is just the end portion of type 2.

I have recorded the serial numbers and which type of variety they are. See the table below to see which one falls into which category. There seems to be an overlapping of serial numbers of the different types.

Type 1 (bl2)

EZ 6472039
EZ 6472756
EZ 6474152
EZ 6478373
EZ 6974046
EZ 6974654
EZ 7449812
EZ 7451023
EZ 7451692
EZ 7451119
EZ 7712031

Type 2 (bl3)

EZ 7446966

Type 3 (bl1)

EZ 6971309
EZ 7449155

EZ 6470753
EZ 6973739
EZ 7450952
EZ 7451114
EZ 7712011
EZ 7712225
EZ 7734336

These are in the study but it is not known which Type they are.

I have received a few serial numbers from different people over time but I do not know which type they are. I have listed them also. If you recognize yours, please send me a note and let me know which type it is. If you can add to this

list, please do. Send your information to Jerome Fourre, 1120 Place Charron, Blainville, Quebec, J7C 2T2 or by phone 450-4197914 or E-mail jayfoure@videotron.ca

Mismatched serial number found in CTC S27-E03 series
