

WHOA! Printer must have been a little sleepy on this one. Could this be a Monday morning print job? But look a little closer. Not only are the 5c denominations misplaced, the "S" in the serial number in UPSIDE DOWN! In fact, let's take a look at a series of four different notes that have a different "S" on each of them.

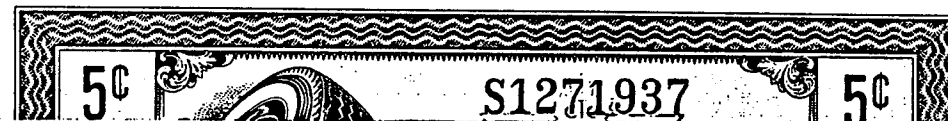

Check out your notes in your collection to see which ones you have. Do you have all four? Maybe you have something completely new! Other prefix letters have peculiar changes, too. If you find some, let us know.
