OSHAWA MEETING HUGE SUCCESS!!

Everyone is in agreement that the April 27th, 1991 meeting of the Canadian Tire Coupon Collectors Club was a thrilling event. For those of you that missed it let me replay the event. The meeting was recorded by Cathy Perry, a CBC Radio Noon technician, for broadcast later in the week in a condensed form. The meeting started with an election of officers to assist in running the club.

The election results can be seen at the top of the page. Real good regional representation from the West to East.

Don Robb provided an exceptional 35mm slide presentation of some 80 slides. Don has put many hours into the slide set and it was really impressive. I would recommend that we ask Don for another show at our meeting at the Canadian Numismatic Association Convention Sunday, July 28 (1:00 to 3:00). I know Don has more to show and he's still working on new ones. What about it Don????

Ovide premiered the black 3¢ 'Tire & Dollar' note with the Sasaki/Muncaster signature, serial W94925 (page 31 in his Guide). Has anyone seen any of these? They appear to be pretty scarce.

Ovide Bilodeau also made a short presentation on a 'new' 3¢ coupon. It seems the CTC dealers have been unhappy handing out 5¢ coupons when they could be handing out a 3¢.

Don't confuse it with the old coupons. I include a photocopy of the find. It seems CTC wanted to make a liar out of me. I had stated that the CTC was withdrawing coupons that were redeemable at the gas bar. These "new" coupons are actually the old S4 series of 3¢ (redeemable at the store or gas bar) but with small red serial numbers on the reverse. They have carried on with the XN prefix. Let's look for highs and lows in these series.

'New' / Old 3¢ small XN serial#
