

Color Varieties

by L.D. Green (m0000339)

I have two CTC 8-E gas bar coupons that have distinct color variations. The first has large serifs (serial # Z 0690807) and has a deep orange color on the back. The front is a light lime green color. The second coupon also has large serifs (serial # Z 0491156) and has a lemon yellow colored back. The front is yellow.

I'm aware that coupons can fade from a variety of causes, but the examples I have are very distinct in color. The information available to me does not touch on colors. I would be interested to hear from someone who could shed some light on this subject or maybe someone who has something similar to my coupons. Please write to me L.D. Green, Box 1684, Brighton, Ontario K0K 1H0
