

## NO SERIAL NUMBER ERROR DISCOVERED IN THE S29-C...

by Louis Fontaine #109

A new error in the 10-cent s29-C was recently discovered. The error has no serial numbers. The Serial number range where this occurred is 0323397593. During printing of the serial numbers a mechanical error occurred with the sheet feeder where another sheet was stuck to sheet 93 and did not get numbered. The next serially numbered note is 0323397594. Every bundle in the 500-599 will have 101 notes rather than the 100 as normal. This error would have begun at 0323350500 and continued to 0323399500, 1 sheet of 50 only.

In the same group, 0323398500 there was one replacement note to replace note 0323398563. There must have been some defect in the original note and was manually replaced. In the bundles previous to 398500 there were no replacements. The serial number of the replacement is 9000555433. There may be 1 more in bundle 399500 but this is not confirmed. If this had been a sheet replacement then there would have been 1 replacement found in each bundle starting at 0323350500 to 0323399500. The signatures continue to be Pasternak/Gauld. Any collectors who find these in new bundles please contact me to confirm. Inquiries may be directed to my email at [lfontaine@shaw.ca](mailto:lfontaine@shaw.ca) or phone (306) 382-7216.

## S20-B VARIETY COMES TO LIGHT...

by Louis Fontaine #109

An interesting variety, which I did not know existed, has come to light. It is the S20-B with Break between A & S and a broken Y in 2 places. I would have said this type of variety was impossible and I apologize to the person I may have said this to. I had not known of any variety other than the ordinary broken A & S. I have included a coupon in that serial number range. (See fig 1 and fig 2)

## S29-B PRE-PRINTING DAMAGED SHEET...

by Louis Fontaine #109

Here is an interesting oddity where damage occurred on one note during printing resulting in a heavy green ink being deposited on subsequent notes. Normal note is 0272698319, Damaged note at left 0272698320, Heavy green on following note gradually fading out at note 0272698323, normal note 0272698324. (See fig 1) Figure 2 shows notes 0272698320 and 0272698321 one on top the other.

Inquiries may be directed to my email at [lfontaine@shaw.ca](mailto:lfontaine@shaw.ca) or phone (306) 382-7216.
