

# CANADIAN TIRE WOODS

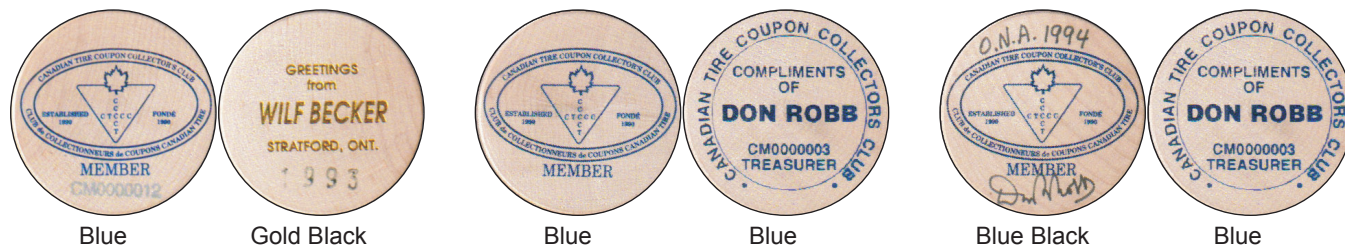

by Norman Belston #583

At the Ontario Numismatic Association Convention in Kingston Ontario, I displayed the following woods that were all Canadian Tire related. I first thought that there were a total

of 16 different ones but there are actually 17. The top 4 are from the maritimes. The next 10 have a common obverse. These 14 are all 38 mm in diameter.

These last 3 are all 45 mm in diameter and the obverse has the first CTCCC logo from 1993 before CTC asked them to use the original CTC logo instead of their own original design. If you know of any others please contact me at : nbelsten@sympatico.ca
